Power supply

NVE-PS200

The **NVE-PS200** power supply is a device designed to power the other components of the NVE series system through the sPOE switches - NVE-SW200-7P. The impulse converter guarantees economical operation of the device. Convenient DIN rail mounting allows quick installation in one housing with switch NVE-SW200-7P. Several types of security guarantee safe operation.

Device type	Power Supply
Continuous power	63W
Input voltage	~100/240V @1.7A 50-60Hz
Protection	Overvoltage, Overload, Short circuit, Thermal
Output Voltage	18VDC
Output current	3A
Additional functions	DIN rail mounting
Dimensions	140 x 97 x 58 mm
Weight	355g
Operating temperature	from 0 to 50 °C
