

Switched-mode power supply for built-in

LRS-50-24

The switched-mode AC/DC power supply is designed to be built-in. The PSU is designed to supply cameras or other devices requiring stabilized voltage of 24V DC and total current output of 2.2A.

TECHNICAL SPECIFICATIONS:

- power output 24V DC / 2.2A
- supply voltage 85 - 264V AC
- security:
 - short circuit protection SCP
 - overload OLP
 - thermal OHP
 - overvoltage protection OVP

MECHANICAL & ENVIROMENTAL:

- working temperature $-30^{\circ}\text{C} \div 70^{\circ}\text{C}$
- dimensions 99x82x30mm (LxWxH)
