The Villa NVE-EPV120KP entrance panel is an elegant and aesthetic device designed for outdoor use, e.g. in front of the entrance to a property. It allows you to easily communicate with the homeowner using the call button and built-in color camera. Infrared (IR) backlighting allows for trouble-free use of the panel even at night. The built-in proximity card reader in the unique 125 kHz standard allows for simple access control and facilitates everyday use of the system. Support for two relays allows for control of both the gate and the door. The panel supports the RTSP protocol, making it possible to stream to Novus CCTV recorders. Image parameters, settings, and network protocols can be configured from the web application client.
