Multi apartment analog switch

NVE-2A-SW100-LAN

The NVE-2A-SW100-LAN analog switch is designed to provide reliable communication between entrance panels and subscriber handsets in NOVUS brand video-intercom systems. It is powered via a 10/100 Mbit LAN port using PoE technology, simplifying installation and removing the need for external power supplies.

The switch supports the connection of up to 60 handsets, ensuring stable performance even in large-scale installations.

Device type	Analog switch
Mounting type	DIN rail
Number of users	60
PoE	48 V DC (802.3af)
Port LAN	1 x 10M / 100M Ethernet
Dimensions	72 x 90 x 59 mm
Weight	120g
Operating temperature	from -30 to 60 °C
Color	Signal White (RAL9003)
