

**Statement of Compliance**  
**for Users of AWID Proximity Readers**  
**in the European Union**

R&TTE Directive 1999/5/EC, Article 6.3, requires that the following statement be included in shipments of the equipment to which Article 6.3 applies.

This AWID Proximity Reader is classified as a Short-Range Device containing a radio transmitter. All models of AWID's Proximity Readers use 125 kHz wireless communications between the readers and their associated encoded credentials (cards, keytags, and wafers in various configurations).

In Annex 9 of the Directive – Inductive Devices of ERC Recommendation 70-03, May 2001 – Short-Range Devices using 125 kHz communications are classified for Free Circulation and as Unlicensed products for the 15 countries in the European Community.

This AWID Proximity Reader conforms to the requirements of the R&TTE Directive. The CE mark is attached to both the Reader and the carton in which it is shipped. [?? Refer to "CE0678" and "CE0976, as in HID's statement ??]
